545/1 CHEMISTRY (Theory) Paper 1 March 2022 1 ½ hours

# **Uganda Certificate Of Education**

### **S.1 COMPETENCE BASED ASSESSMENT EXAMINATIONS**

CHEMISTRY (THEORY)

Paper 1 1Hour: 30 minutes

### **INSTRUCTIONS:**

- This paper consists of **five** questions.
- Answer **all** questions in the spaces provided.
- Illustrations in form of drawings should be made where necessary, with a sharp pencil.

# For official use only

	nile in the laboratory? Identify any two precautions
taken if any?	(02 marks
c) Assuming you were invited to this class to to	alk to the students about laboratory safety. Write
a simple message you would give them to en	sure they stay safe while in the chemistry
laboratory.	(05 marks
•••••	

4. From the particle theory of matter, all matter is made up of small particles that are in a constant and random state of motion. A group of senior two students from EDUCAN school carried out an investigation about particles of air using a balloon. They inflated it as shown below;

(a) Explain now the particles of air inside the balloon create pressure to make it sw	ell
outwards.	(02 marks)
	•••••
b) When the students put the balloon under sunshine for some hours, it was observed	d that the
calloon increased in size. How can you explain this observation using the particle the	eory of
matter?	(03 marks)
c) The students left the balloon in the laboratory for seven days, after which they ol	oserved that
he balloon had decreased in size. Give an explanation as to why the balloon reduc	ed in size
after seven days.	(03 marks)

(d) Give any two differences in the arrangement	and behavior of particles in solids and in
gases.	(02 marks)
Particles in solids	Particles in gases

	erent experiments are called Apparatuses. Like
	ens, different tools are used for different roles.
Using your knowledge about laboratory a	pparatus and experimental chemistry, identify
the most suitable apparatuses that can be	used to carry out the following steps in an
experiment;	
(a) Measure 200 ml of water and boil the water	. (02 marks)
(b) Take out 10 drops of liquid A from bottle Q	and 10 drops of liquid B from bottle P.
Then mix A and B.	(02 marks)
(c) Measure 5 g of salt and 100 ml of water. Dis	ssolve the salt in water by mixing and
stirring them.	(03 marks)
(d) The figure below shows some apparatuses us	ed in a chemistry laboratory. Identify any three
apparatuses shown in the figure, and state one u
